

- **Project Title**

IDEA Furniture Website

- **Introduction**

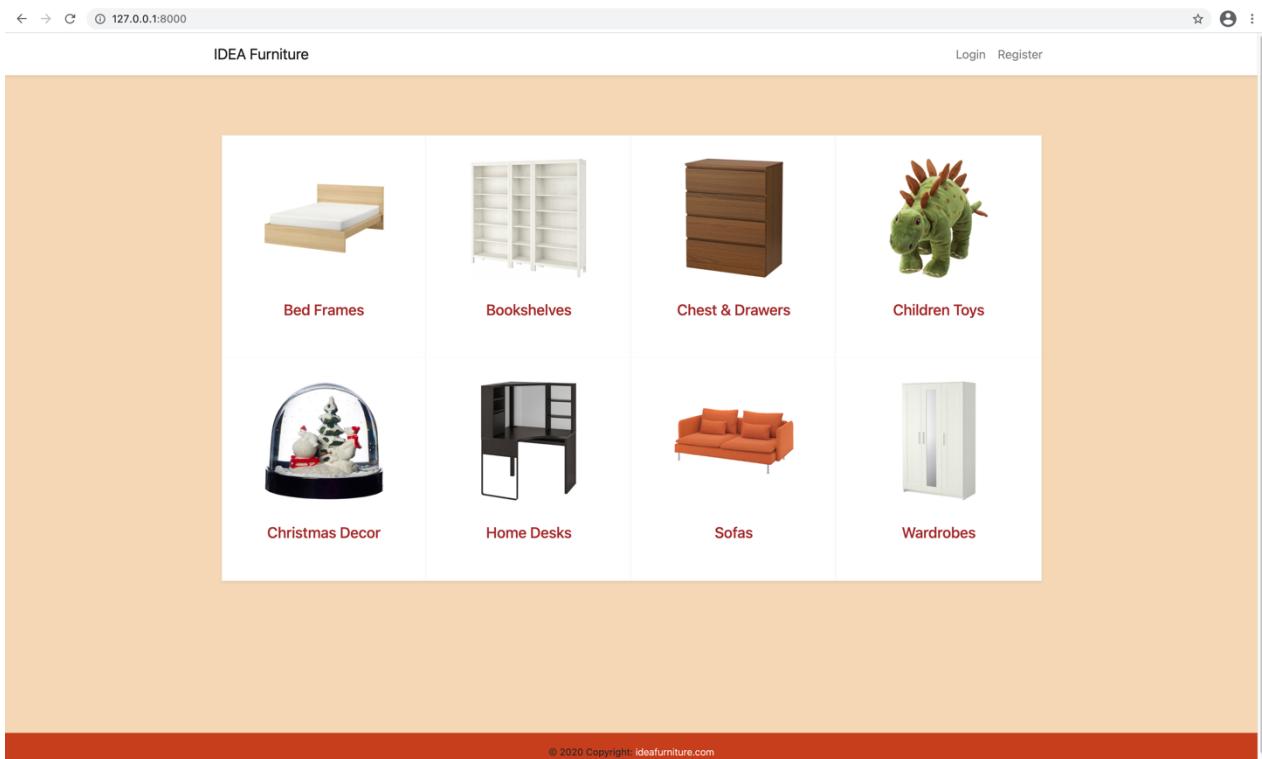

For this project, we built a website using Laravel 7 for IDEA Furniture which is an Indonesian multinational corporation that is engaged in design, development, and sales of furniture, kitchen appliances, home accessories, and other useful goods.

In this website, customers may find the information about the company's products and they can place orders to purchase the available products as well.

- **Report / Documentation**

There will be three types of user role in this website: Admin, Member, and Guest (non-logged-in user).

*Home Page (for guests)*

This home page can be accessed by all user roles and is the first page the customers will see when first opening the website. The page itself will display all the product types the website has to offer. Each product type will have its image and name shown. If user clicks on one of them, the user will be redirected to View Product Page of the selected product type.

Moreover, as we can see in the top part of the page, there is a navigation bar in which the user can click the login button to log in or the register button to register a new account.

## Register Page (for all users)

The screenshot shows a web browser window titled "Idea Furniture" with the URL "127.0.0.1:8002/register". The page has a header with "Idea Furniture", "Login", and "Register" links. Below the header is a "Register" form. The form fields are: Name (empty), E-Mail Address (empty), Password (empty), Confirm Password (empty), Date of Birth (empty), Address (empty), Gender (radio buttons for Male and Female), and a "Register" button.

- The name must be at least 6 characters.
- The password must be at least 8 characters.
- The password confirmation does not match.
- The address must be at least 10 characters.
- The gender field is required.
- The dob must be a date before today.

The screenshot shows the same "Register" page as above, but with validation errors applied to each field. The errors are:

- Name: "The name must be at least 6 characters."
- Password: "The password must be at least 8 characters."
- Date of Birth: "The dob must be a date before today."
- Address: "The address must be at least 10 characters."
- Gender: "The gender field is required."

The "Register" button is still present at the bottom.

This page can be accessed only by Guest. The page allows guests to create an account as a new Member. If the user submit invalid inputs, error messages will be displayed to notify the invalide ones. Otherwise, the user will successfully create a new account and be directed to the home page (or in other words, be immediately logged in).

## Login Page (for all users)

The top screenshot shows a successful login attempt. The user has entered their email address and password, checked the "Remember Me" checkbox, and clicked the "Login" button. A success message "These credentials do not match our records." is displayed in a pink banner at the bottom.

The bottom screenshot shows an unsuccessful login attempt. The user has entered an incorrect email address ("admin@email.com") and password. An error message "These credentials do not match our records." is displayed in a red box next to the email input field.

This page can be accessed only by Guest. The page allows user to login into the website if the user already has an account. The credentials used for authentications are Email and Password. Error messages will be displayed if the inputted email and password does not match the records. If user has entered the correct credentials, the user will be redirected to the Home Page. Additionally, if user checks the “Remember Me” checkbox, the website will record the Email and Password using cookies for 12 hours.

The screenshot shows the Network tab in the Chrome DevTools. The "Application" tab is selected. A table lists three cookies:

Name	Value	Domain	Path	Expires / Max-Age	SameSite	HttpOnly	Secure	Priority
laravel_session	eyJpdil6lndrRWJZ...	127.0.0.1	/	Session	3...	✓		Lax
XSRF-TOKEN	eyJpdil6lVtT1Qw...	127.0.0.1	/	2020-12-07T19:16:21.808Z	3...			Lax
remember_web_59ba36ad...	eyJpdil6lJKdDJp...	127.0.0.1	/	2020-12-08T05:16:21.708Z	4...	✓		Lax

As we can see when logging in while checking the “Remember Me” checkbox, a cookie will be generated which will last for 12 hours. It is important to note that the cookie uses UTC (+7 hours).

## Home Page (for admins)

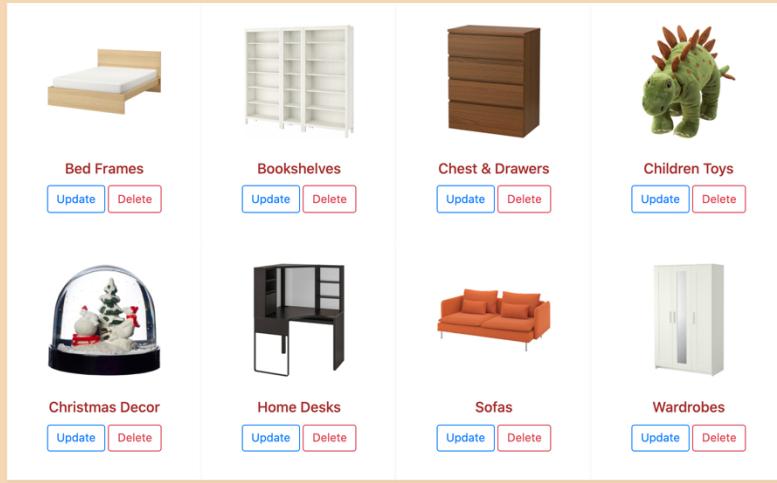

The screenshot shows a web application interface for 'Idea Furniture'. At the top, there's a header bar with a back arrow, forward arrow, search icon, and user profile icon. The URL '127.0.0.1:8002/home' is displayed. On the right side of the header, there are links for 'Add Product', 'Add Product Type', and a dropdown menu for 'admin'. Below the header is a section titled 'Idea Furniture' with a sub-section 'Add Product Type admin'. The main content area displays a grid of eight product categories: 'Bed Frames', 'Bookshelves', 'Chest & Drawers', 'Children Toys', 'Christmas Decor', 'Home Desks', 'Sofas', and 'Wardrobes'. Each category has a small image, a name, and two buttons: 'Update' (blue) and 'Delete' (red). At the bottom of the page, a red footer bar contains the copyright information '© 2020 Copyright: ideafurniture.com'.

Back to the home page again, if the current user is Admin, then each product type will have update, and delete button. When the user clicks on update button, redirect user to Update Product Type Page. When the user clicks on delete button, delete the selected product type.

## Update Product Type Page (for admins)

The screenshot shows two instances of the 'Edit Product Type' form. The top instance is for 'Bookshelves'. It has fields for 'Name' (containing 'Bookshelves') and 'Image' (with a 'Choose Image' button and a 'Browse' button). A blue 'Save' button is at the bottom. A red error message at the bottom of the page states: '• The name field is required.' The bottom instance is also for 'Bookshelves' and has the same fields and layout, but it does not show the error message.

The product type **Bookshelves** was updated.

This page can be accessed only by Admin. The page will show detail information of current product type in input field format. Admin can update the information of all the provided fields. When the admin clicks on update button, validate the inputs to satisfy its requirements. If there are any invalid input, error messages will be displayed to notify admins the invalid parts. Otherwise, the information about the product type according to the admin inputs will be updated then show success message while redirecting back to the home page which will show all of the product types again along with the newly updated one.

This page can be accessed only by Admin by clicking the button on the navigation bar above. The page will provide necessary input fields for admins to insert new product information. When the admin clicks on add button, validate the inputs to satisfy its requirements. If there are any invalid input, error messages will be shown to notify admins the invalid part. Otherwise, the new product will be created and a success message will be shown.

## Add Product Type Page (for admins)

The figure consists of three vertically stacked screenshots of a web application interface for adding product types. All three screenshots have a header bar with the text 'IDEA Furniture' on the left, 'Add Product' and 'Add Product Type' in the center, and 'admin' with a dropdown arrow on the right.

- Screenshot 1:** Shows the initial 'Add Product Type' form. It has two input fields: 'Name' (empty) and 'Image' (with a placeholder 'Choose Image' and a 'Browse' button). A blue 'Save' button is at the bottom.
- Screenshot 2:** Shows the same form after validation errors have been triggered. The 'Name' field now contains the letter 'a', which is invalid. The 'Image' field also has an error message: 'The image must be a file of type: jpeg, png, gif.' A red horizontal bar at the top displays these validation errors.
- Screenshot 3:** Shows the form after a successful addition. The 'Name' field is now empty again. A green horizontal bar at the top displays the success message: 'The product type **Test** was created.'

This page can be accessed only by Admin by clicking the ‘Add Product Type’ button on the navigation bar above. The page will provide necessary input fields for admins to insert new product type information. When the admin clicks on add button, validate the inputs to satisfy its requirements. If there are any invalid input, error messages will be shown to notify admins the invalid part. Otherwise, the new product type will be created, and a success message will be shown.

## Edit Product Page (for admins)

This page can be accessed only by Admin. The page will show detail information of current product in input field format. Admin can update the information of all the provided fields. When the admin clicks on update button, validate the inputs to satisfy its requirements. If there are any invalid input, error messages will be displayed to notify admins the invalid parts. Otherwise, the information about the product type according to the admin inputs will be updated then show success message while redirecting back to the home page which will show all of the product types again along with the newly updated one.

The screenshot shows the 'Edit Product' page with the following data entered:

Field	Value
Name	Nordli
Image	Choose Image
Product Type	Bed Frames
Stock	609
Price	7499000
Description	Bed frame with storage, white

A blue 'Save' button is at the bottom left.

- The name field is required.
- The stock must be greater than 0.
- The price must be greater than 0.
- The description must be at least 15 characters.

The screenshot shows the 'Edit Product' page with the following validation errors:

- The 'Name' field is required.
- The 'Stock' field must be greater than 0.
- The 'Price' field must be greater than 0.

The 'Description' field has a minimum character requirement of 15, but this is not explicitly shown as an error message in the visible area.

The product **Nordli** was updated.

## Home Page (for members)

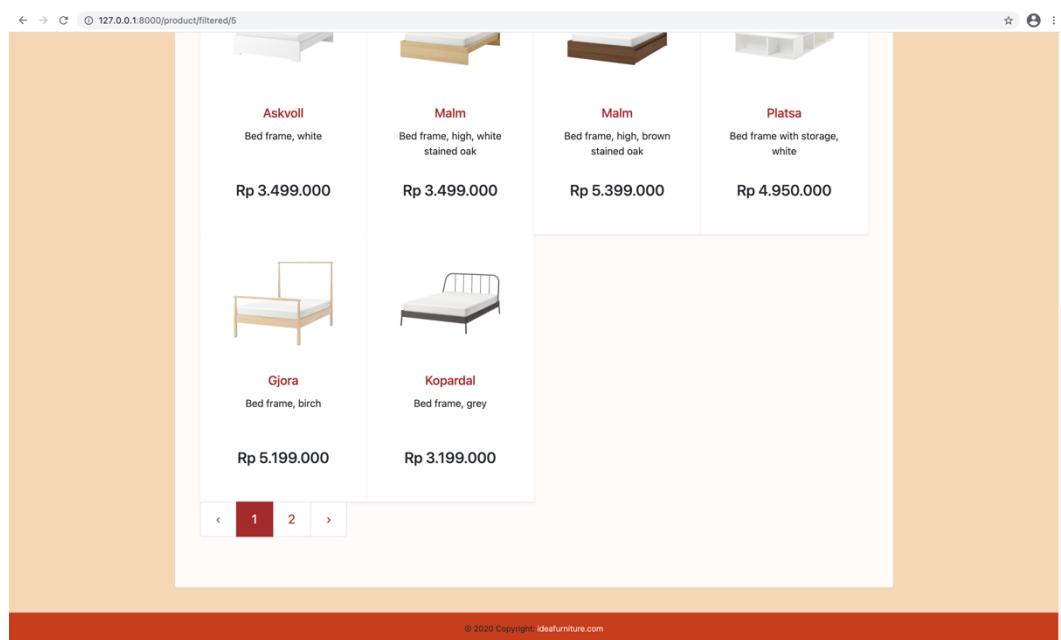

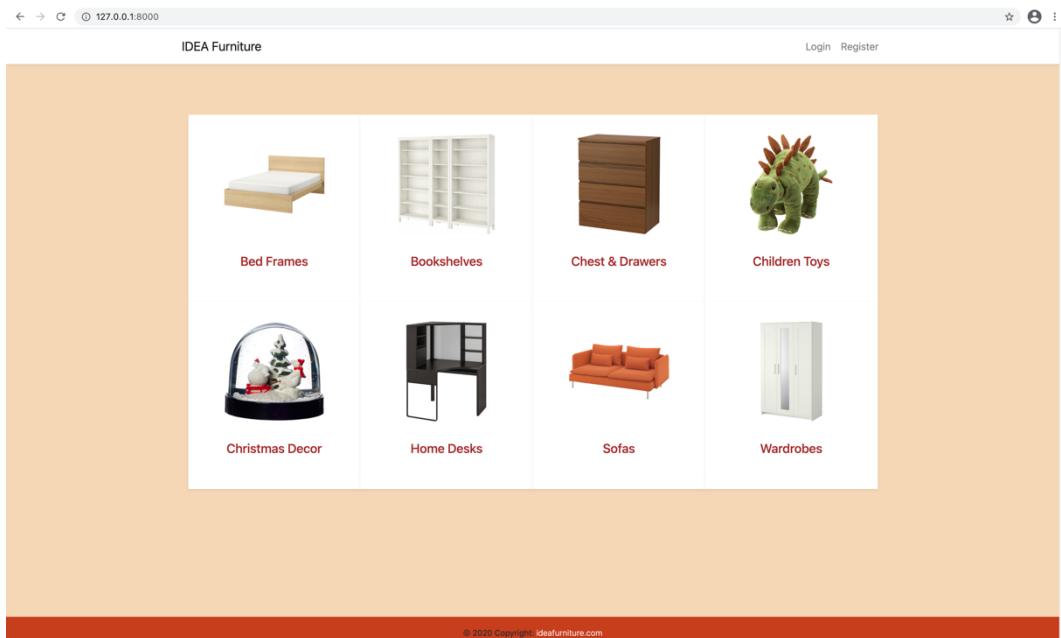

© 2020 Copyright: ideafurniture.com

Back to the home page again, if the current user is a Member, this page has similar view with the home page for guests that display all the product types the website has to offer. Each product type will have its image and name shown. If user clicks on one of them, the user will be redirected to View Product Page of the selected product type. The only difference is the Navigation Bar.

On the right side of the nav bar there is a drop down menu that shows the member's name, and if it is clicked there will be shown 4 menu items, namely Shopping Cart menu where the user can see their shopping cart item list, Transaction History menu where the user can see their transaction history list, and Edit Profile menu where the user can edit their profile information and Logout button .

## Products Page

If on the Home Page the user clicks one of the Product Type images, then they will be redirected to this View Product Page of the selected product type. Both member and guest will have the same view as the example above. Each product has its image, name, price, and description shown. If the user clicks on the product, then they will be redirected to Product Detail Page of the selected product.

This page also supports search feature that helps the user to find product of current product type by its name. If the product searched by the user is not found, then it will be shown in the page that the search result for that product is not found. Also, in this page, the products are separated into pages where in one page only contains ten products.

### *Product Details Page*

The Product Details Page can be accessed by all user roles (guest, member, admin). This page displays the detail information (name, description, price, and stock) of the current product selected by the user. For the Member, there is an additional form field which contains quantity input number field and an 'Add to Cart' button which only appear for the user with role 'Member'. When the member clicks on the button, the system will validate the input field and if the input is valid then the product will be added into the member's shopping cart and shows a success message, otherwise if the input is invalid, then an error message will be shown.

## Edit Profile Page (for members)

A screenshot of the 'Edit Profile' page at 127.0.0.1:8000/edit-profile. The page has a header 'IDEA Furniture' and a user profile 'Jeremy Anugera'. The main form contains fields for Name (filled with 'Jeremy Anugera'), Date of Birth (set to '02/12/2020'), Address ('Ruko Pinangsa Blok M No.2'), Gender (selected 'Male'), and an 'Update' button. A green success message at the top of the page says 'Your profile has been successfully updated.'

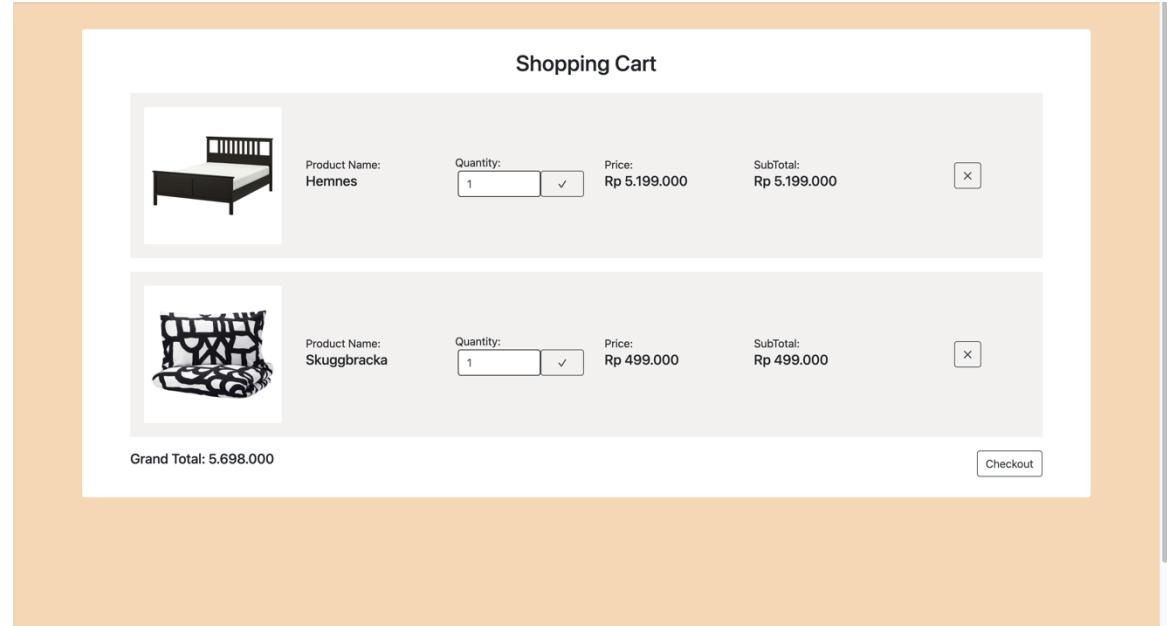

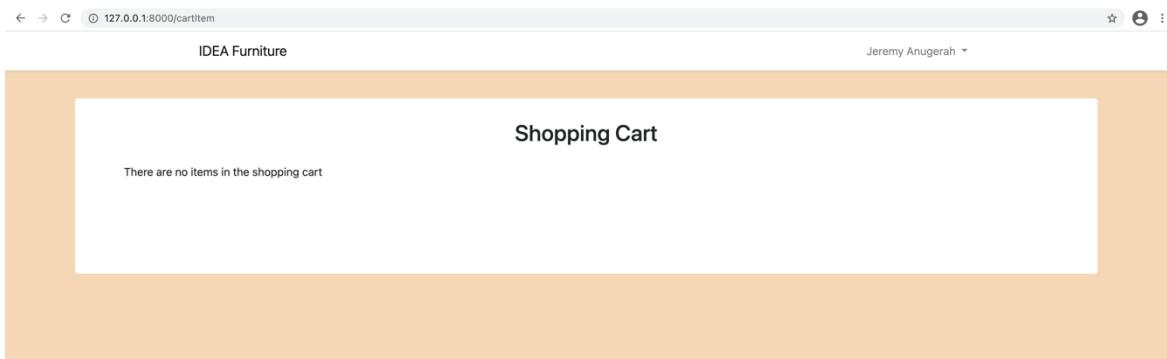

A screenshot of the 'Edit Profile' page. The 'Name' field contains 'Jerricho Test', which is too short. The 'Address' field contains 'Pluitttttttttttttttttt', which is too long. Both fields have red validation error messages: 'The name must be at least 6 characters.' and 'The address must be at least 10 characters.' respectively. The rest of the form fields (Date of Birth, Gender) are correct.

A screenshot of the 'Edit Profile' page. The 'Name' field contains 'Jerricho', which is too short. The 'Address' field contains 'Pluitttttttttttttt', which is too long. Both fields have red validation error messages: 'The name must be at least 6 characters.' and 'The address must be at least 10 characters.' respectively. The rest of the form fields (Date of Birth, Gender) are correct.

This page can be accessed only by Member. To access this page, Members must click the dropdown menu at right side of the navigation bar that shows their username then click the Edit Profile menu. This page allows the member to update their personal information (name, date of birth, gender, and address). When the member clicks on update button, the system validates the inputs to satisfy its requirements. If there is any invalid input, error messages will be displayed to notify members the invalid parts. Otherwise, the profile information will be updated then show success message.

### *Shopping Cart (for members)*

This page can be accessed only by Member. To access this page, Members must click the dropdown menu at top right of the website (username). The page will display all added products in the cart. There will be three buttons; update buttons, delete buttons, and checkout button. When user clicks on update button, update quantity based on the input field. When user clicks on delete button, remove the product from shopping cart. Lastly when user clicks on checkout button, remove all products from shopping cart and insert them into transaction history.

The product Nordli has been deleted from the cart.
